

Chapter 6: Statement Selection Screen

The **Statement Selection Screen** is a screen that supports the data entry, validation, CPA Certification, and submission functions of the system.

The **Statement Selection Screen** provides:

- A view of all properties associated with the created submission record.
- Information on each property associated with the submission record.
- A link to the data entry screens for each statement associated with the submission,
 - For single property and combined submissions, only one link is provided.
 - For consolidated submissions, a link to data entry screens for each statement (entity-level and each property) associated with the submission record is provided.
- A validation status for each statement associated with the submission.
- A link to print the data once the statement is validated.
- Buttons to submit for CPA Certification, Review of CPA Certification Results, and Submission of the AFS data to HUD will be displayed, based upon the validation status of the statement(s) associated with the submission record and the status of the submission record.

Viewing Statement Data and Printing

Viewing Statement Data

After a statement is validated and before it is submitted to HUD or, in the case of audited statements, submitted for CPA Certification, Submitters can review the account data, list of accounts and data entered for each template (e.g., Balance Sheet Data, Cash Flow Data, etc.). Any changes or saving of the data will require the user to validate the statement again. Once an audited statement has been submitted for CPA Review or has been CPA Approved, the templates may be viewed but are not editable. CPA Certifiers are allowed to view only statement data for audited statements that are submitted for CPA Review. If the statement has been CPA Disapproved, the Submitter is allowed to edit the statement.

To view statement data, click on the statement link in the *Project* column. The data displays as either editable or non-editable based on the user role, the type of submission and the status of the statement.
